

Ted's Triplet #3

Ted Sannella

Measure	Count	Figure
A1	8 8	Top two couples make a right hand star. The other way back with a left hand star.
A2	8 8	First couple go down the center & cross over (The lady is on the left side of her partner when the couple goes down the center. They should go beyond the foot of the set and then cross over with the lady passing in front of her partner.) Come up the outside to the top place.
B1	16	First couple face down - the others face up. Dip and dive all six. (The dip and dive figure (see Glossary) begins with the first couple moving under an arch formed by the second couple and then raising their joined hands to make an arch for the third couple to pass under. Each couple turns as a couple, or does a California turn, when arriving at either end of the set so that the ladies remain on the right side of their partners throughout the figure. B1 concludes with all three couples in their original order.)
B2	16	First couple casts down the outside and swings at the foot of the set. (As the first couple moves down the outside in B2. the other two couples must move up to fill the first and second places.)
